

Chapter 1 — Operations	1
Introduction.....	1
Professional Advice	2
Regulations, Standards and Guidance.....	2
Regulations.....	2
Industry Standards.....	3
ISO	3
ANSI	4
Guidance Documents	4
Units of Measurement.....	4
Risk Reduction.....	4
Risk Analysis	4
Quantification.....	5
Flammable and Combustible Materials	5
Flammable Range	5
Flammable Limits	5
Flash Point.....	6
Combustible Liquids	7
Class II Liquids	7
Class III Liquids.....	7
Flammable Liquids.....	8
Ignition Sources	9
Area Classification.....	10
Housekeeping.....	11
General Neatness.....	11
Proper Placement	11
Grass and Brush	12
Equipment and Piping.....	12
Storage and Handling of Flammable Liquids	12
Regulations and Standards.....	12
Handling Requirements	13
Non-Process Operations.....	13
Outside Storage	13
Coal and Coke Storage.....	14
Drum Storage	14
Drainage	14
Fire Protection and Prevention.....	14
Cylinders	15
Loading Racks.....	15
Simultaneous Operations (SIMOPs).....	16
Managing SIMOPs.....	17
SIMOPS Matrix	18
Conducting the SIMOPs	18
Kick-Off Meeting.....	19
Communication Meetings	19
Close Out.....	20
Examples.....	20
Example 1 — Facility Design	20
Example 2 — Heat Exchanger	21
Chapter 2 — Maintenance and Inspection	22

Introduction.....	22
Types of Maintenance.....	22
Repair Maintenance	22
Condition-Based Maintenance	22
Scheduled Maintenance	23
Reliability-Centered Maintenance.....	23
Maintenance Task Organization	24
Step 1 — Plan the Work.....	24
Step 2 — Conduct a Job Hazards Analysis.....	25
Step 3 — Issue a Work Permit.....	27
Step 4 — Shutdown and Isolate Equipment.....	27
Step 5 — First Break.....	27
Step 6 — Perform the Work.....	27
Step 7 — Close Out the Work.....	27
Step 8 — Handover to Operations	28
Readiness Review	28
Mechanical Completion	28
Pressure Tests.....	29
Maximum Allowable Working Pressure.....	29
Test Medium	30
Tightness Tests.....	31
Strength Tests.....	31
Testing Procedures	32
Hydrostatic (Liquid).....	32
Pneumatic (Gas).....	32
Installing Blinds	32
Pressure Test Manual	33
On-Line Cleaning and Repair	35
Inspection.....	37
Regulations and Standards	38
Inspection Frequency	38
Inspection Records	39
Risk-Based Inspection.....	39
Analyze Risk.....	40
Determine Costs.....	40
Allocate Resources.....	41
Chapter 3 — Energy Control Procedures	42
Introduction.....	42
Regulations and Standards	42
OSHA 29 CFR 1910.119	42
OSHA 29 CFR 1910.146	43
API 2015	44
API 2026	44
API 2217A	45
ANSI Z117.1	46
Removal of the Hazard	48
Equipment and Piping.....	48
Venting and Draining Requirements.....	48
Manways	49
Electrical Equipment.....	49
Mechanical Equipment.....	49

Pipe Plugs.....	49
Minimizing Contact with Air.....	50
Limiting Oxygen Concentration	50
Blanketing.....	53
Tank Filling and Emptying	53
Heavy Sludge Deposits.....	53
Spills and Overflows.....	54
Flame Propagation through Drains	54
Catching Samples.....	54
Air-Blowing of Hydrocarbon Lines	55
Positive Isolation.....	55
Level 1 — Closed Valve.....	56
Control Valves	57
Blow-Down Valves.....	57
Shut-Down Valves.....	58
Level 2 — Closed Valve with Open Bleeder.....	58
Level 3 — Double Block and Bleed	58
Level 4 — Block and Bleed with Line Break	59
Level 5 — Block, Bleed and Spectacle Blind.....	60
Level 6 — Double Block and Bleed with Blind	61
Level 7 — Double Block and Bleed with Line Break	61
Lockout / Tagout.....	61
Car Seals	61
Group Lockout.....	62
Lockboxes	62
Padlocks	63
Tags.....	63
Removing Locks and Tags.....	64
Electrical Isolation	65
Administrative Controls.....	65
Work Permits	65
General Work Permits.....	66
Issuance of Permits	66
Changes in Conditions	67
Multiple Work Permits	67
Hot Work Permits	67
Confined Space Entry	69
Types of Space.....	71
Non-Hazardous Space.....	71
Hazardous Space.....	71
The Entry Permit.....	72
Personnel.....	72
Entrant.....	73
Supervisor	73
Manway Attendant.....	73
Gas Tester	74
Rescue Team.....	74
Preparation	74
Job Hazards Analysis.....	74
Isolate the Equipment	75
Drain Liquids, Purge and Ventilate.....	75

Test.....	76
Tie-Ins	77
Hot Tapping	77
Plugged Lines.....	77
Prevention of Pluggage	78
Unplugging a Line	80
Mechanical	81
Differential Pressure.....	81
Fluid Selection	82
Steam	82
Compressed Gas.....	82
Chapter 4 — Occupational Safety.....	84
Introduction.....	84
Measuring Performance	84
Safety Manual	85
Behavior Based Safety	90
Observed Hazard Card	91
Five by Five Policy	91
Lone Worker Policy	92
Incident Reporting.....	92
Reports	92
Vehicle Incidents	92
Near Misses.....	93
Portable Gas Detectors.....	93
Machinery Safety	93
Fall Protection.....	93
Definitions.....	94
Fall Protection System	95
Fall Arrest System Equipment	96
Dropped Objects	97
Compressed Gas Cylinders	97
Overhead Power Lines	97
Cranes and Rigging.....	98
Lifting Precautions	98
Crane Operation	99
Chapter 5 — Chemicals.....	100
Introduction.....	100
Fluid Categories	100
Material Safety Data Sheets	100
Global Harmonization System	103
The Safety Diamond	104
Exposure Limits	106
Emergency Response Planning Guidelines (ERPGs)	106
Immediately Dangerous to Life and Health	107
Permissible Exposure Limits (PEL).....	108
Threshold Limit Values (TLV)	108
Short Term Exposure Limit (STEL)	109
Benzene.....	109
Hydrogen Fluoride	109
Unloading.....	110
KOH Beds	110

Dedicated Flare	110
Sulfur Dioxide.....	110
Hydrogen Sulfide	111
Toxicity	112
Flammability	113
Location of Monitors.....	113
Corrosion.....	113
Chlorine.....	114
Carbon Monoxide	114
Carbon Dioxide.....	114
Nitrogen	115
Lead.....	116
Chapter 6 — Personal Protective Equipment	117
Introduction.....	117
Employer Responsibility.....	117
Regulations and Standards	117
Clothing.....	118
Flame Resistant Clothing	119
Impervious Clothing.....	120
Laboratory Clothing.....	120
Emergency PPE.....	120
Firefighter Protective Clothing	120
Proximity Suits.....	120
Respiratory Protection.....	121
Fixed Breathing Air Systems	121
Respirators	121
Air-Purifying Respirators.....	121
Supplied Air Respirators.....	121
Self-Contained Breathing Apparatus (SCBAs).....	122
Chemical Canister Rebreathers.....	122
Disposable Respirators.....	122
Use of Respirators.....	122
Head Protection.....	123
Additional Equipment / Markers.....	123
Color Schemes	124
Maintenance and Storage	124
Hand Protection.....	124
Foot Protection.....	125
Eye Protection.....	125
Safety Glasses	126
Chemical Goggles	126
Chapter 7 — Health and Industrial Hygiene	127
Introduction.....	127
Employee Access to Records	128
Asbestos	128
Noise	128
Regulations and Standards	129
MSHA 30 CFR 62	129
OSHA 1926.101 — Hearing Protection	129
OSHA 1910.95 — Occupational Noise Exposure	129
NIOSH: Noise and Hearing Loss Protection	130

EEMUA	130
Definitions.....	130
Decibel	130
Time-Weighted Average (TWA).....	130
Hertz.....	130
Noise Dose	131
Threshold Limit Value (TLV)	131
Noise Limits	131
Continuous Noise.....	133
Intermittent or Fluctuating Noise	133
Noise Control	133
Remove the Source	133
Modify the Source.....	133
Relocation / Barriers	134
Enclose Equipment	134
Hearing Protection	134
Administrative Controls.....	135
Vibration Control	135
Industry Issues.....	135
NORM (Naturally Occurring Radioactive Material)	135
Regulations and Standards	136
TENORM.....	136
Exposure.....	136
Treatment	136
Water / Dry Blasting	136
Safe Limits	137
Protective Measures	137
Lifting	137
Heat Stress	137
Heat Index	137
Types of Heat Stress.....	137
Heat Stress Factors.....	138
Heat Stress Prevention	139
Cold Stress	140
Types of Cold Stress	140
Equivalent Chill Temperature.....	140
Controlling Cold Stress.....	140
Radiant Heat.....	141
Food and Galley Hygiene	141
Methods of Preservation and Treatment	142
Treating Contamination	142
Storage and Cooking Temperatures	143
Facilities and Equipment.....	143
Alcohol and Drug Policy.....	143
Coverage	144
Affected Participants.....	144
Applicants for Employment	145
Testing.....	145
Contractors	146
Chapter 8 — Human Factors and Ergonomics.....	147

Introduction.....	147
Process Safety Management	147
Human Error	148
Errors of Intent	149
Errors of Action	150
Slips	150
Mistakes	150
Fixation	151
Error in an Emergency	151
THERP	151
Ergonomics	153
Muculoskeletal Disorders.....	153
Fix the Person	153
Fit the Person to the Task.....	153
Change the Person.....	153
Change Performance.....	154
Change the Work or Workplace.....	154
Work Stations.....	154
Human Factors on Projects	154
Phase I — Concept Selection.....	154
Phase II — Preliminary Engineering	155
Phase III — Detailed Engineering	155
Control Rooms	155
Valve Criticality Analysis.....	155
Category 1	156
Category 2	156
Category 3	156
Signs.....	157
Regulations and Standards	157
Types of Sign	158
Prohibition	158
Mandatory Action	158
Warning	159
Safe Condition	160
Fire Safety.....	160
Labeling	160
Color Coding.....	161
Exposed Piping	161
Hoses.....	162
Chapter 9 — Firefighting.....	163
Introduction.....	163
Regulations and Standards	165
Principles of Fire Fighting	165
Remove the Fuel Source	165
Consequence and Likelihood	166
Safeguards.....	166
Single Fire Concept.....	166
Fire Zones	166
Fire Water	167
Water Capacity and Rates	168
Deluge Systems.....	168

Sources of Fire Water.....	168
Testing.....	169
Fire Water Pumps and Drivers	169
Jockey Pumps.....	170
Main Fire Pumps.....	170
Fixed Water Spray Systems	170
Automatic Sprinkler Systems.....	171
Monitors / Hose Carts	171
Fire Water Distribution System	171
Materials of Construction	172
Layout	172
Deluge Valves.....	172
Hydrants.....	172
Other Firefighting Media	172
Halon.....	173
Steam	173
Foam Systems	173
Carbon Dioxide.....	173
Earth-Moving Equipment	174
Underground Firewater Systems.....	174
Portable Fire Extinguishers.....	174
Location	174
Types.....	175
Water Extinguishers.....	175
Carbon Dioxide Extinguishers.....	175
Dry Chemical Extinguishers	176
Training.....	176
Chapter 10 — Safety in Design.....	178
Introduction.....	178
Units of Measurement.....	178
Fire Protection.....	178
Fireproofing	179
Passive Fire Protection.....	181
Fireproofing Materials	181
Fireproofing Insulation.....	182
Stairways, Ramps and Platforms.....	182
Regulations and Standards	183
Terminology.....	183
Spiral / Winding Stairs.....	184
Landings.....	185
Design Load	185
Stair Rails.....	185
Stair Treads	185
Ramps.....	186
Fixed Ladders.....	186
Guidance	186
Safety Cages and Gates.....	188
Rungs and Stringers	189
Intermediate Platforms.....	190
Work Platforms and Walkways	190
Handrails and Toeboards	190

Tank Gauging Platforms	191
Connected Tanks.....	191
Emergency Showers and Eyewashes	191
Regulations and Standards	191
Risk Management	192
Release Points and Location	192
Safety Shower Design.....	194
Flow Rates and Pattern	196
Visibility and Accessibility.....	196
Alarms.....	196
Electrical Area	197
Freeze Protection	197
Heat Protection.....	197
Enclosures	197
Using the Shower	198
Inspection	198
Eye-Wash Units	198
Chapter 11 — Siting and Layout.....	200
Introduction.....	200
Regulations and Standards	200
Siting	201
Layout	202
Spacing.....	204
Process Equipment.....	206
Property Lines	207
Blocks and Roads.....	207
Routine Access and Egress	207
Firefighting Access	208
Hazardous Chemical Areas.....	208
Secondary Containment	208
Drainage	209
Equipment.....	209
Vessels	210
Pumps.....	212
Hydrocarbon Storage Tanks.....	213
Compressors / Compressor Drivers	215
Heat Exchangers	215
Air Fin Coolers.....	216
Boilers and Steam Generators.....	216
Cooling Towers.....	216
Fired Equipment.....	217
Equipment Stacking	217
Air Intakes.....	217
Piping and Valves	218
Utilities.....	219
Instruments and Cables	220
Electrical Substations.....	221
Bare-Wire Electric Power Lines	221
Buildings	221
Occupied Buildings.....	223
Electrical Rooms/Substations.....	223

Pressurized Enclosures.....	223
Process Buildings.....	223
Temporary Buildings.....	224
Control Buildings.....	225
Control Laboratories / Analyzer Buildings.....	225
Warehouses.....	226
Inside Storage.....	226
Operator Shelters.....	227
Electrical Equipment Buildings.....	227
Non-Process Buildings.....	227
Loading and Unloading.....	227
Emergency Equipment.....	228
Process Isolation Valves.....	228
Emergency Stations.....	229
Hydrants and Monitors.....	229
Fire and Gas Detection.....	229
Regulations and Standards.....	229
Layout of Detectors.....	229
Responses.....	231
Fire Detection.....	232
Flammable Gas Detection.....	232
Fire / Flame Detection.....	233
Heat Detection.....	233
Fusible Links.....	233
Smoke Detection.....	234
Ultrasonic Detectors.....	234
Closed-Circuit Television.....	234
Toxic Gas Detection.....	234
Manual Alarm Call Points.....	235
Offshore Facilities.....	235
Safe Areas.....	237
Operations.....	237
Emergency Evacuation and Rescue.....	238
Temporary Refuge.....	238
Wellbay Area.....	239
Drilling Rigs.....	240
Pipeline Equipment.....	242
Fire Protection / Fire and Gas Detection.....	242
Helidecks.....	242
Transfer Areas.....	242
Piping.....	243
Rotating Equipment.....	243
Chapter 12 — Equipment.....	244
Introduction.....	244
Pressure Vessels.....	244
Regulations and Standards.....	244
Factory Acceptance Tests (FAT).....	246
Spare Parts.....	247
Vessels under Vacuum.....	247
Reflux Vessels.....	247
Small Pipe Connections.....	247

Storage Tanks.....	248
Fixed Roof Tanks.....	250
Floating Roof Tanks.....	251
Pumps.....	252
Pump Casing	252
Seals and Packing.....	253
Minimum Flow Bypass.....	253
Pump Isolation	254
Safety Issues.....	255
Compressors.....	255
Liquid Knockout on the Compressor Suction.....	255
Relief Valves.....	255
Compressor Isolation	255
Shutdown and Alarm Systems	256
Heat Exchangers	256
Shell and Tube Heat Exchangers	257
Air-Cooled Exchangers.....	257
Cooling Towers.....	258
Fired Heaters.....	259
Regulations and Standards	259
Startup of Fired Heaters	259
Air Preheaters.....	261
Fired Heater Burnout.....	261
Boilers	261
Internal Combustion Engines.....	262
Starter Systems.....	263
Intake, Exhaust and Fuel Systems.....	263
Electrical Equipment.....	264
Ground Fault Circuit Interrupters.....	264
Chapter 13 — Piping and Valves.....	265
Introduction.....	265
Piping	265
Materials.....	265
Insulation.....	265
Gaskets	266
Threaded Piping	266
Thermal Expansion	266
Identification and Labeling of Pipes	266
Testing and Inspection	266
Blinds	267
Line Blinds.....	267
Spectacle Blinds.....	268
Valves	268
Block Valves	268
Valve Seat Material.....	268
Self-Closing Valves	268
Check Valves	268
Emergency Isolation Valves	269
Excess Flow Valves	269
Trapped Liquids	270
Plugs.....	270

Pressure Relief Devices	270
Design Parameters.....	270
Regulations and Standards	270
Pressure Safety Relief Valves	271
Pilot-Operated Pressure Relief Valves.....	273
Thermal Relief Valves	274
Discharge Piping.....	275
Testing and Inspection	276
Rupture Disks.....	277
Hatches / Doors.....	278
Flame Arrestors.....	279
Thermal Flame Arrestors	279
Detonation Arrestors	280
Water Seal-Type Flame Arrestors.....	280
Velocity-Type Flame Arrestors.....	280
Flares.....	281
Engineering Standards	281
Types of Flare	281
Smokeless Operation.....	281
Location of Flares	282
Chapter 14 — Safety Instrumentation.....	283
Introduction.....	283
Regulations and Standards	283
IEC 61511	283
IEC 61508	284
Alarms.....	284
Alarm Design	284
Alarm Management.....	285
Safety Instrumented Systems	285
Safety Integrity Level.....	286
Design	286
Quantitative Analysis.....	287
Testing and Inspection	287
Emergency Shutdown	288
HIPPS.....	289
Chapter 15 — Transportation	291
Introduction.....	291
Regulations and Standards	291
Road Vehicles	291
Vacuum Trucks	291
All-Terrain Vehicles.....	293
Loading / Unloading	293
General Procedures	293
Control Measures	294
Bonding.....	295
Switch Loading	295
Tank/Rail Cars	296
Additives	296
Marine Transport.....	296
Personnel Transfer Baskets	297
Cargo Baskets	300

Rigid Frame Baskets	302
Helicopters	302
Guidance	302
Personnel Movement	302
Air Turbulence	303
Rescue	303
Regulations and Standards	303
Chapter 16 — Security	306
Introduction	306
Regulations and Standards	307
Types of Attack	307
Members of the Public	307
Vandalism	307
Theft	308
Activists	308
Sabotage	308
Terrorism	309
Visible Security	309
Population Density	309
High Profile	309
Security Vulnerability Analyses	310
Rings of Protection	310
Cybersecurity	310
Managing Security	311
Culture	311
Inherent Safety	311
Access Security	311
Personnel Screening	311
Equipment Modifications	311
Response to a Threatening Call	312
Chapter 17 — Common Hazards	316
Introduction	316
Process Hazards	316
High Flow	316
Low / No Flow	316
Reverse Flow	317
Misdirected Flow	318
High Pressure	318
High Temperature	319
Blocked-In Pump	320
Polymerization	320
External Fire	320
Low Pressure	321
Low Temperature	321
High Level	321
Wrong Composition	321
Corrosion	322
Chemical Embrittlement	323
Strong Oxidizers	323
Static Electricity	323

Hazards of Utilities	324
Common Cause Failure.....	324
Process Contamination.....	324
Electrical Power Failure.....	324
Nitrogen	324
Reverse Flow to a Utility Header.....	325
Survivability of Utilities.....	326
Hazards of Water	326
Water in Hydrocarbon Tanks	326
Water in Very Hot Liquid	326
Water and Firefighting.....	327
Hazards of Steam	327
Steaming Vessels during Turnaround	327
Reboiler Leak.....	328
Wet Steam.....	329
Hazards of Ice	329
Line Freezing	329
Hydrates	329
Hazards of Compressed Gas	329
Gas Cylinders.....	329
Pigging Incident.....	329
Hazards of Air.....	330
Flammable Mixture.....	330
Blowing a Line Clear.....	331
Hazards of External Events.....	331
Flooding.....	331
Lightning.....	331
Earthquakes.....	331
Hazards of Equipment and Instruments	331
Furnace Firing.....	331
Fired Heater Burnout.....	332
Multiple Uses of Equipment	332
Distributed Control Systems	333
Hazards of Piping, Valves and Hoses	334
Piping.....	334
Pipe Class Transition	334
Hydraulic Hammer.....	334
Pig Launchers and Receivers.....	335
Pressure in Relief Headers	335
Overload of Overhead Vacuum Lines	335
Underground Piping.....	336
Vents and Bleeders	336
Hoses.....	336
Hoses and Truck Pull-Away	336
Hose Run Over.....	336
Hose Failure.....	337
Backflow Preventor	337
Temporary Connection	337
Valves.....	337
Block Valves below Relief Valves	338
Fail-Safe Control Valves.....	339

Shared Relief Valve	339
SDV Bypass	340
Citations.....	342
